AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A method for fabricating a counter electrode for a dyesensitized solar cell, the method comprising:

co-sputtering platinum and a metal oxide as target materials onto a substrate; and forming a counter electrode including nanocrystalline platinum and an amorphous metal oxide on the substrate, wherein the counter electrode has a non-layered structure; and contacting the counter electrode with a light-absorbing dye, wherein the metal oxide

comprises a metal having an open structure and wherein the metal oxide is selected from oxides of tantalum and silicon.

- 2. (Original) The method of claim1, wherein the metal oxide has a refractive index of 2 or higher.
 - 3. (Canceled)
- 4. (Original) The method of claim 1, wherein the metal oxide has an electric conductivity of at least 0.1 S/m.

5-14. (Canceled)
